#	Finding
1	Delivery performance deteriorated sharply in July: average delivery time increased from 38.33 min in April to 51.76 min in July.
2	Late deliveries became a major issue: Late >15 min Rate rose from 8.63% to 28.91%.
3	The main operational bottleneck appears to be courier assignment: preparation time increased only from 14.94 to 16.51 min, while assignment time increased from 4.47 to 10.49 min.
4	Customer impact worsened alongside delivery performance: customer cancellation rate increased to 7.89%, support contact rate to 10.44%, and courier rating fell to 4.38.
5	!If July customer cancellations had remained at the June rate, approximately 85 orders could potentially have been retained, representing about **€2,393.89** in additional GMV.

SAKE RESTAURANT — SYNTHETIC RAW DATASET	
Purpose	Synthetic order-level dataset for Google Sheets / Junior BA analysis.
Rows	10,000 order records + header.
Period	April–July 2026.
Important	Synthetic data generated from the aggregate KPI pattern in the case study; not real company data (study case!).
Cleaning	RAW_Orders intentionally contains a small number of realistic data-quality issues. Exact locations are not disclosed.
Workflow	Keep RAW_Orders untouched → duplicate into Clean_Data → clean → formulas/filters → Pivot Tables → KPI analysis → charts → Key Findings.
